Between July and August 2015, Food and Non-Alcoholic Drinks' Index decreased by 0.26 per cent. This was mainly due to favourable weather conditions which have prevailed in recent months and which caused observed decreases in prices of several food items.

During the review period, Housing, Water, Electricity, Gas and Other Fuels' Index, increased by 0.76 per cent. This was mainly attributed net cost increases in respect of cooking fuels and other household utilities. The cost of electricity consumption for instance, surged upwards due to increases in both fuel cost adjustment and foreign exchange charges per KWh of electricity consumed.

Despite notable fall in the cost of diesel, the Transport Index increased by 1.42 per cent over the same period. This was mainly due to continued rise in the cost of petrol, fares and other transport costs.
