

CONSUMER PRICE INDICES AND INFLATION RATES FOR DECEMBER 2020

Kenya National Bureau of Statistics hereby releases Consumer Price Indices (CPI) and inflation for December, 2020. As shown in Tables 1 and 2, the CPI increased by 0.98 per cent from 110.779 in November 2020 to 111.866 in December 2020. The overall year on year inflation in December 2020 was 5.62 per cent.

Consumer price indices and inflation rates are generated from data collected through monthly surveys of retail prices that targets a representative basket of household consumption goods and services. The data collection is conducted in the second and third weeks of the month from selected retail outlets. The retail outlets are located in 50 data collection zones.

The month to month Food and Non-Alcoholic Drinks' Index increased by 2.45 per cent between November and December, 2020. The corresponding year on year food inflation rose by 7.19 per cent. This food inflation was mainly attributed to increase in prices of particular food items, which outweighed the decreases. For instance, as shown in Table 3, retail prices of loose maize flour and capsicums (pilipili hoho) declined by 1.28 per cent and 8.91 per cent, respectively. On the other hand, prices of spinach, oranges and kales (sukuma-wiki) rose by 8.09, 6.18 and 5.61 per cent, respectively.

The Housing, Water, Electricity, Gas and Other Fuels' Index, increased by 0.59 per cent between November and December, 2020. This was mainly attributed to increases of 0.76 per cent and 2.08 per cent, in cost of electricity and kerosene, respectively.

The Transport index increased by 1.15 per cent over the same period mainly due to a rise in the retail prices of diesel and petrol by 1.20 per cent and 0.92 per cent, respectively.
